LIFE SCIENCE · PART A · TRIMESTER 1

Name _____

Cells, Microscopes and the Lab: Review

Date _____ Period _____

Answer in complete sentences when it asks you to explain. Answers are in the answer key that comes with this worksheet in Classboard.

A · LAB SAFETY AND TOOLS

1. Your partner spills an unknown liquid on the table. List two things you should do.

2. Which tool would you use to measure exactly 25 mL of water? How do you read it correctly?

B · MICROSCOPES

3. Fill in the total magnification for a 10× eyepiece:

Objective	Total magnification
4×	
10×	
40×	

4. Why should you only use the fine focus knob on high power?

5. Put these steps in order: __ switch to a higher objective · __ place the slide on the stage · __ focus with coarse, then fine · __ start on the lowest objective · __ sharpen with fine focus only

C · SCIENCE SKILLS

6. Leo tests if music helps bean plants grow. Group A hears music; group B doesn't. Name the independent variable, dependent variable, control group and one controlled variable.

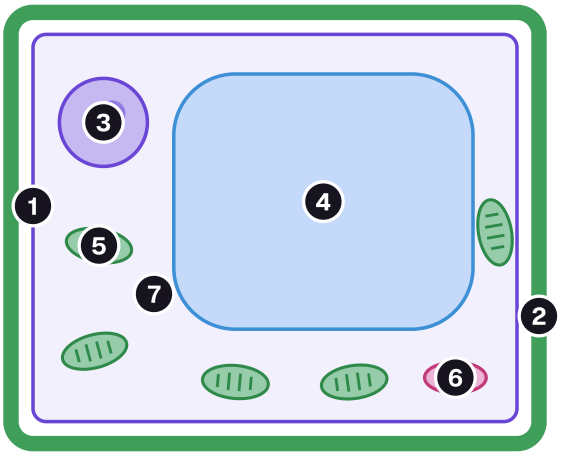

D · LIVING THINGS AND CELL THEORY

7. Write the three parts of the cell theory.

8. Claim, evidence, reasoning: Is a crystal that "grows" in salt water alive?

E · CELL PARTS

9. Name each numbered part of this plant cell.

10. Match each part to its job: nucleus, mitochondria, chloroplast, cell membrane, ribosome.
a) makes proteins · b) control center · c) controls what enters and leaves · d) releases energy from food · e) makes food from sunlight

11. Name three parts found in plant cells but not animal cells, and two parts found in both.

F · LEVELS AND BODY SYSTEMS

12. Put in order from smallest to largest: organ system, cell, organism, organ, tissue.

13. Give an example of each level for the human body: tissue, organ, organ system.

14. You start running. Explain how your respiratory and circulatory systems work together.
